1   Introduction

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. $\sin^2(\alpha) + \cos^2(\beta) = 1$. If you read this text, you will get no information $E = mc^2$. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. $\sqrt[n]{a} \cdot \sqrt[n]{b} = \sqrt[n]{ab}$. This text should contain all letters of the alphabet and it should be written in of the original language. $\frac{\sqrt[n]{a}}{\sqrt[n]{b}} = \sqrt[n]{\frac{a}{b}}$. There is no need for special contents, but the length of words should match the language. $a\sqrt[n]{b} = \sqrt[n]{a^n b}$.

Winery [1] is graphical modeling tool.

Simple Figure

Figure 1. Simple Figure

Table 1. Simple Table

Simple Table

cref Demonstration: Cref at beginning of sentence, cref in all other cases.

Figure 1 shows a simple fact, although Fig. 1 could also show something else.

Table 1 shows a simple fact, although Table 1 could also show something else.

Section 1 shows a simple fact, although Sect. 1 could also show something else.

Brackets work as designed: <test>

The symbol for powerset is now correct: $\wp$ and not a Weierstrass p ($\wp$).

1. All these items... 2. ...appear in one line 3. This is enabled by the paralist package.

"something in quotes" using plain tex or use "the enquote command".

2   Conclusion and Outlook

Acknowledgments ...

In the bibliography, use `\textsuperscript` for "st", "nd", ...: E.g., "The 2nd conference on examples".
